

Hydrous Ethanol for Gasoline Blending: New Science Promises Cost and Energy Savings (HE Blends BV)

HE Blends BV (ISAF XVII, China, October 2008): This paper describes the scientific basis of the invention and the testing conducted to date to confirm this discovery under real-world conditions. In addition to summarizing the results of HE Blends BV's own evaluation and testing activities to date, the paper describes further international testing and demonstration programs being implemented or planned to fully prove out the practicability and advantages of hydrous ethanol.....(view the full paper)
